

Quarterly Revenue Review

Prepared by the Analytics Working Group.

Section 1. Summary

Total revenue for the quarter reached 4.82 million CNY, up 17 percent year over year. Gross margin held at 41 percent.

Section 2. Cost Structure

Cloud infrastructure accounted for 612 thousand CNY, or 12.7 percent of revenue. Headcount cost grew 6 percent, below the revenue growth rate.

Section 3. Outlook

We expect the next quarter to land between 5.1 and 5.4 million CNY. The primary risk is renewal timing for three enterprise contracts.

Section 4. Actions

Renew the three enterprise contracts before the end of the quarter.

Publish the cost dashboard to all department leads.

Re-forecast headcount after the renewal outcome is known.
